

Outside™ GP TH 434

Antenna covering 434 MHz ISM band for mounting on both metallic and non-metallic surfaces. The antenna can either be connected by RG174 or RG58 cables.

The antenna can be supplied with various cable lengths and connectors.

Applications

Automated Meter Reading

Telemetric

M2M-communications

Alarms

Technical data

Frequency	434 MHz
VSWR	< 3:1
Gain	Max 0 dBi
Dimension	130 x 45 mm, height 27 mm
Polarization	Vertical
Mounting	M16 bolt
Connection	1.5 m, 3 m RG174 or 5 m RG58 with SMA/m
Temperature	-40 to +85° C

Note: Subject to change without notice.
